## SUGURU

Each cell in an outlined block must contain a digit: a two-cell block contains the digits 1 and 2, a three-cell block contains the digits 1, 2 and 3, and so on. The same digit must not appear in neighbouring cells, not even diagonally.

## SUKO

Enter numbers 1 to 9, so that the number in each circle equals the sum of its four surrounding squares. The numbers in each differently coloured area should add up to the totals, right.
